

The contractual extension agreement of the collaboration research with Sankyo Co., Ltd

Nimura Genetic Solutions Co., Ltd. (also known as NGS; Tokyo, Japan) and Sankyo Co., Ltd. (Sankyo; Tokyo, Japan) have agreed to extend the existing contractual agreement for another three years, which involves continuity of collaborative research to screen candidate compounds for drug discovery from Malaysian microorganism metabolite.

The collaborative research has been conducted in Malaysia and Japan, since March, 2004. With the enforcement of this agreement NGS and Sankyo will continue the research by utilizing isolated microorganisms from Malaysian soil and in compliance to Sankyo's protocol for the research of potential compound for drug discovery.
