

The collaborative research agreement with University Malaysia Sabah (UMS)

Nimura Genetic Solutions Co. Ltd. (also known as NGS; Tokyo, Japan) has signed a contractual agreement with Institute for Tropical Biology and Conservation (ITBC), University Malaysia Sabah (UMS) for the collaboration research through Nimura Genetic Solutions (M) Sdn. Bhd.

ITBC, recognized as key research centre of Borneo Biodiversity and Ecosystem Conservation (BBEC), is a research institute which is subsidized technology transfer and facilities of grant by the Japan International Cooperation Agency (JICA).

UMS is not the authority for the access of natural resources, but it has an advisory influence to the local Sabah's government authority. As for NGS, access to the natural resources of Sabah was enabled substantially by having contractual collaborative research agreement with UMS.
