

A Success Story: Securing Grant from the Ministry of Science, Technology and
Innovation (MOSTI) of Malaysia

Nimura Genetic Solutions Co. Ltd. (NGS; Tokyo, Japan), received the biotechnology grant (eScience fund) from the Ministry of Science, Technology and Innovation (Malaysia), in cooperation with the Forest Research Institute of Malaysia (FRIM), through Nimura Genetic Solutions (M) Sdn. Bhd.

Strict evaluation has to be conducted prior to the approval of the eScience fund, which is given for fundamental biotechnological researches in Malaysia.

The project theme is exploratory researches of actinomycete in the provision of FRIM forest's biodiversity. With NGS's techniques of isolation and genotyping, researches being conducted include collection, identification and characterization of actinomycete strains from FRIM research sub-station.

With the securing of this grant, it is proven that NGS is capable and possible to establish more fruitful collaboration research with Malaysia's government related organizations or private entities in the future.
